As Halıcı Bilgi İşlem, we are looking for full-stack developer team members.

You will be coding new features and improve the existing products .
You will continuously improve yourself with your team members learning new technologies and acquiring new skills.
You will participate in planning meetings, estimate tasks, do code reviews.

SKILLS / EXPERIENCE

Strong JavaScript/TypeScript programming skills
Hands on experience in ReactJs, React Native, NodeJs or similar technologies
Experience in REST / stateless API design
Hands on experience with Ruby On Rails is a big plus.
OOP, MVC knowledge is a plus
Being an Agile minded team player, having good communication skills
Eagerness on self-improvement, open-minded, future-oriented
Strong analytical, problem solving, debugging and troubleshooting skills
Preferably experienced in web sites that work under high user loads

WHAT'S IN IT FOR YOU?

Take responsibility from day one, improve your skills and learn continuously.
We have open communication, teamwork. We value talent, not titles!
Working in an engaging workplace and being a precious part of our dynamic team.
